ALTERNATIVES FOR KNEE
PAIN RELIEF WITH GEL
INJECTIONS:

If steroid injections don't help, Georgia Medical Treatment Center can inject a pain relief medication called sodium hyaluronate (brand names are Hyalgan, Synvisc, Supartz, or Ortho-Visc) into the knee. The sodium hyaluronate will help the joint move smoothly, reducing or relieving the pain of osteoarthritis. Usually a series of injections over several weeks is needed to achieve the desired pain relief.

AMNIOTIC FLUID INJECTIONS TO TREAT PAINFUL KNEES:

A Randomized Controlled Single-Blind Study Demonstrating Superiority of an Amniotic Suspension Allograft Injection over Hyaluronic Acid and Saline Control for Modification of Knee Osteoarthritis Symptoms

Patients who got amniotic injections claimed they had reduction in inflammation within hours of the treatment. It takes a few weeks to fully replace the damaged cells. The healing process depends upon the patient's body constitution.

Platelet Rich Plasma (PRP)

Platelet Rich Plasma (PRP) is vastly becoming a popular form of treatment for many forms of arthritis and joint pain related conditions. It has been used for years in the dental, plastics, and wound care specialties. There are many studies currently supporting the efficacy and beneficial properties of PRP for the treatment of arthritis.

PRP for Knee Arthritis pain is a very common problems and causes huge disability

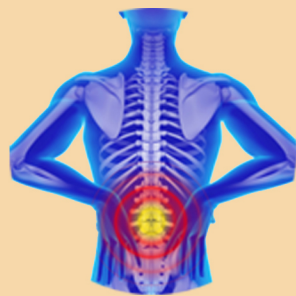

Many patients struggle to get relief by taking anti-inflammatory medications. Sometimes a steroid injection can help in relieving pain, but these medications are unfortunately only short term and are not safe for everyone and have potential side effects. If these conservative treatments do not work and your pain still persists, then PRP therapy (platelet rich plasma therapy) may be an effective treatment option for you. PRP is commonly used today in sports medicine and various orthopedic conditions. Studies have proved its efficacy in relieving pain associated with an arthritic knee.

There are currently many studies underway involving a large number of patients who have knee arthritis, but the treatment of PRP for arthritis is widely being performed. PRP has growth factors in the form of proteins that play a role in the natural process of healing, therefore injecting concentrated growth factors to the site of injury can indeed cause new cell growth and promote healing of damaged cartilage that is associated with arthritis and pain.

Interventional Pain Management

We evaluate patients with symptoms of chronic pain such as complex regional pain syndrome, degenerative disc disorders of the neck and back, osteoarthritis, osteoporosis, fibromyalgia, and neuropathy. We offer interventional spinal therapeutics for pain such as image guided spinal diagnostic and therapeutic injections including epidurals, facet injections, radio frequency ablation, and spinal cord stimulators.

Georgia Medical Treatment Center Interventional Pain Medicine is dedicated to the treatment of acute and chronic pain. Our board certified pain management physician provides high quality specialty care including image guided procedures for spine pain, nerve pain and musculoskeletal pain.

Auto Accidents And Personal Injury

Georgia Medical Treatment Center have helped Auto Accident & Personal Injury sufferers for over 20 years in the Canton area.

We have a staff of doctors that consist of a : Physiatrist, Nurse Practitioner, Orthopedist, Physician Assistant and a Chiropractor to help you get back to your original health prior to the accident.

We also have a network of specialist that we work with on a regular basis.

NECK AND BACK PAIN

Georgia Medical Treatment Center uses state-of-the-art minimally invasive techniques to restore function and to improve your quality of life. Your treatment is provided by physicians that have received extensive post - graduate and fellowship training in fluoroscopic spinal procedures. Our team's goal is to provide each patient with Comprehensive high-quality care using superior treatments. We also provide an array of non-surgical procedures to facilitate the reduction and recurrence of your back, neck and joint pain.

Spinal Decompression Therapy

A true breakthrough solution for those who suffer from neck & back pain an all-natural, non-invasive alternative to relieving chronic back and neck pain, spinal decompression treatments are safe and effective without the risks of surgery, injections, and medications. With spinal decompression, you no longer have to suffer with chronic low back pain from conditions such as disc bulge, sciatica or herniated discs. This advanced, computerized medical device maintains individualized settings for each patient. It is a therapy program like no other, fully integrated with other modalities, and has actually been touted as a replacement for surgery, without the side effects.

DIABETES RELIEF

Breakthrough Treatment For Diabetes

Infusion Treatments For Diabetics Physiologic Cellular Restoration. Physiologic Cellular Restoration is a unique and groundbreaking patented approach developed by Diabetes Relief where insulin is administered as a hormone rather than a drug, it addresses the primary cause of diabetes, which is metabolic failure. By using insulin in a manner that bio-mimics normal physiology, we're able to reduce insulin resistance, which helps blood sugar more readily enter each cell and be converted into energy

Increasing cellular energy allows damaged tissues and organs to grow, repair, and regenerate. Thus, our approach not only stabilizes, but in many instances has reversed complications of diabetes and other metabolic disorders.

HORMONE
REPLACEMENT THERAPY
FOR
MEN & WOMEN

*Do you suffer from depression, fatigue, mood swings, and/or lack of strength?
Hormone Replacement Therapy: Best, Safe, & Effective Way to Fight Against Low Testosterone for
Men and Women!*

Lack of sex drive and erectile dysfunction

Hormone Replacement Therapy (HRT) may help solve your issues.

MEDICAL WEIGHT LOSS

Our Medical Weight Loss Program is designed to rid the body of toxins, provide the energy to lose pounds and inches and provide the kick-start to help you make the changes needed to maintain healthy lifestyle. It challenges conventional wisdom about weight loss and views excessive weight as a medical condition requiring medical attention. This program has been researched and involves the use of FDA-approved medications. They are fully endorsed medications. Most people have little or no side effects. Our programs ensure the right combination of protein, carbohydrates, fat, fiber and essential vitamins and minerals that your body needs for Optimal weight loss success.

HCG RX+ WEIGHT LOSS INTERVENTION PROGRAM

HCG or Human Chorionic Gonadotropin is fastest growing cure for people struggling to lose weight. Nicknamed the “weight loss cure”, HCG is endorsed by medical professionals as a major breakthrough producing unheard of results for patients without harmful side effects. HCG is an all natural weight loss program that is helping patients lose up to a pound per day, with many losing over 30 pounds each month! HCG helps you cut the fat in the hard to manage areas like hips and stomach, allowing you to achieve rapid weight loss and improved body shape during and after treatment.

Currently, one of the best weight loss programs with high rate of success is the Human Chorionic Gonadotropin hormone, or HCG weight loss program. This program combines a low-calorie diet with daily injectable drops of the HCG hormone to mobilize fat reserves and facilitate burning calories. Under normal circumstances, a low-calorie diet will slow one’s metabolism and cause the body to start storing fat, meaning the diet will become less and less effective as the body adjusts. The HCG hormone accommodates this by mobilizing this fat and making it easier to burn off through exercise and normal activity. With supervision from and periodic visits to our weight loss clinic, it can be extremely effective in shedding pounds and keeping them off.

SERMORELIN

SECRET WEAPON
TO WEIGHT LOSS

What is Sermorelin?

Sermorelin, medically termed as growth hormone releasing factor 1-29 *12-acetate, is a bio-identical human growth hormone that has been genetically engineered to trigger the production of growth hormone releasing hormone (GHRH) coming from the hypothalamus, a gland next to the pituitary gland. GHRH is a type of peptide containing 29 amino acids present on our own growth hormone. These amino acids are the active ones of GHRH. GHRH stimulates the pituitary gland to release growth hormones. As we age, the hormones secreted by the pituitary gland become depleted. Studies have shown the Sermorelin can restore the growth hormone to a youthful level by elevating the levels of IGF-1 (Insulin-like Growth Factor 1).

Sermorelin for Fat Loss:

Fat has become a great threat in everyone's life due to unhealthy food habits i.e. fast food, processed food, junk food in a fast moving world which leads to various diseases and the certain types of cancer, diabetes, obesity, stroke. There has never been a better time to try Sermorelin while following a strict and healthy regime to reduce fat. It has become necessary to lead a healthy life, but its not always easy, That why the peptide in Sermorelin is highly popular. It helps people lose weight quickly and easily.

How does Sermorelin Work?

Sermorelin is a growth hormone releasing hormone that enhances the body's natural release and production of the human growth hormone and Growth Factor. As a result, Sermorelin creates new muscle cells & burns fat Other benefits include:

- Muscle growth
- Better, deeper sleep
- Improved memory
- Reduce Water retention
- Build's muscle
- Increase sex drive

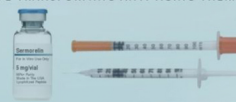

Sermorelin Makes Losing Weight Easy!!

Sermorelin has the best peptides for fat loss. Thanks to its ability to suppress hunger and increase weight loss, you can be sure that Sermorelin is the best avenue for losing weight. Sermorelin alone is good and very effective.

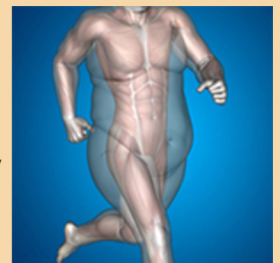

SERMORELIN INJECTIONS

LIFE TRANSFORMING ANTI-AGING THERAPY

Sermorelin benefits

- ▶ Decreased body fat
- ▶ Faster healing time
- ▶ Increased strength
- ▶ Improved sleep
- ▶ Enhanced skin elasticity
- ▶ Greater energy levels
- ▶ Improved blood flow
- ▶ Increased lean muscle mass

GEORGIA MEDICAL TREATMENT CENTER

Integrated Multidisciplinary Medical Clinic

Our Team Of Doctors And Medical Professionals:

Satish Cuddapah, M.D. Functional Medicine

Dr. Cuddapah received his medical training at Northeastern Ohio Universities College of Medicine. Upon receiving his M.D. degree in 1997, he completed an internship at the University of Florida at Coral Springs Medical Center. Dr. Cuddapah subsequently completed his residency in Family Practice at the University of Tennessee at Chattanooga/ Erlanger Medical Center in 2002 and has been board certified in Family Practice ever since.

He went into private practice in Cartersville, GA in 2002 and performed the full spectrum of family practice, both outpatient and inpatient care along with managing nursing home patients. Realizing limitations provided by traditional conventional medicine, he went on to specialize in utilizing multiple natural and alternative oral and intravenous treatments to successfully treat hundreds of patients over the southeast suffering from chronic pain and fatigue symptoms at the Fibromyalgia and Fatigue Center.

He also provides routine health care to patients using innovative combinations of bio-identical hormones, natural supplements, and prescription medications as necessary to optimize his patients health and overall well being. Dr. Cuddapah has a special interest in Endocrinology (thyroid, diabetes, and hypoglycemia), Weight Management, Healthy Aging, and Pain Management. His lifestyle approach has led to many of his patients being able to safely discontinue their multiple chronic daily prescription medications.

Eric A. Cavaciuti, D.C.

Physiology & Radiology

Dr. Cavaciuti is a 1997 graduate of Life University. He received his undergraduate degree from the University of Southern Florida. He is certified in physiology, radiology, and manipulation under anesthesia.

Ronson Royer, DPT, ECS, RDMS, RVT, RT (N)

Dr. Ronson is a Doctor of physical therapy with Board Certification in Electro Diagnostic Clinical Specialties.

He is a graduate of The Medical College of Georgia with multiple degrees, including Nuclear Medicine.

Derek S. Scott, MD Physical Medicine

Dr. Derek Scott received his medical degree at Meharry Medical College. He is board-certified by the American Board of Physical Medicine and Rehabilitation, as well as, board eligible for Electro Diagnostic medicine, Pain medicine, Sports medicine, Interventional Spine, Musculoskeletal & Neuromuscular Rehabilitation, and Functional Pain Management. He is a physical medicine and rehabilitation specialist (physiatrist) with a clinical practice emphasis in diagnostic EMG, therapeutic spinal and extremity injections, and treatment/rehabilitation of musculoskeletal & neuromuscular disorders.

Dr. Scott evaluates patients with symptoms of chronic pain such as complex regional pain syndrome, degenerative disc disorders of the neck and back, osteoarthritis, osteoporosis, fibromyalgia, and neuropathy. He offers interventional spinal therapeutics for pain such as image guided spinal diagnostic and therapeutic injections including epidurals, facet injections, radio frequency ablation, and spinal cord stimulators.

James P McGraw, III, MPAS, PA

Orthopedic Surgery & Sports Medicine

James has been a Physician Assistant since 1996. He has worked in the field of orthopedic surgery and sports medicine for over 15 years, a year in rheumatology, and in pain management and integrated healthcare at Back to Life since 2014. James also works part time for Integrated Practice Solutions as a national trainer at various clinics around the country.

James has trained and worked with Dr. Victor Loria in Miami, Florida, at the Loria Medical Male Enhancement Clinic. Dr. Loria is the physician who formulated the permanent collagen filler that we use for the male enhancement procedure.

James strives to increase access to quality health care and believes patients deserve the best possible treatments for optimal outcomes that he can provide. He has a level of great compassion, a wonderful bedside manner and listens to his patients. He believes in treating a patient as an individual with specific needs as opposed to just being a number. James has been blessed with many gifted talents for procedures in the field of medicine.

During his professional career, James has served on the national board directors of the American Academy of Physician Assistants and the National Commission for the Certification of Physician Assistants when he was the national student President of the academy. He was also the co-recipient of the National Public Education Achievement Award for the creation of the first web page in the Physician Assistants student academy in the mid 1990's.
